

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification to read as follows.

Page 14, the paragraph appearing at lines 9-10:

--As mentioned above, the polymer film 4 is a polymer having the coupling
between the carbon atoms.--

Page 16, the paragraph appearing at lines 7-12:

--When the polymer film 4 is formed by the ink jet system, ~~although the~~
solution of polymer material is applied as liquid droplets and then is dried/
the solution of a desired precursor polymer may be applied as liquid droplets and then be
polymerized by heating.--

into a solid state polymer film.
